

Welcome to the next generation of TV over IP.

Launch an unparalleled full TV experience on all three screens, and leverage RayV's Global HDTV Network to immediately reach your consumers in 140 countries. All without any major investment and ready to launch within days. RayV's Cloud TV provides a turnkey solution from ingestion to HDTV streaming to all devices.

3-screens – TV Anywhere Anytime

Web - Full interactive web experience including HD streaming with integrated packaging, content and user management.

Mobile - Custom iPad, iPhone and Android applications including live channels, EPG and favorites tabs.

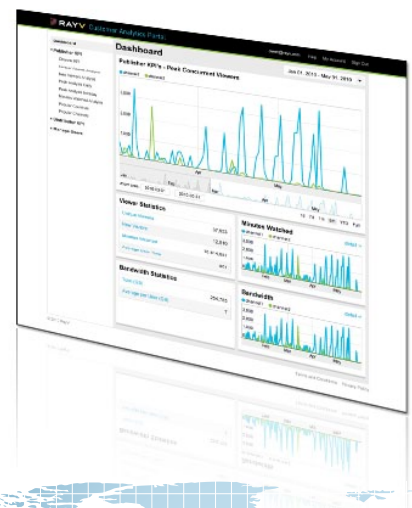

TV - A range of Set-top boxes ready to go for Over-The-Top broadcasting, fully integrated with all the other screens.

All the applications are fully customizable to meet your branding needs.

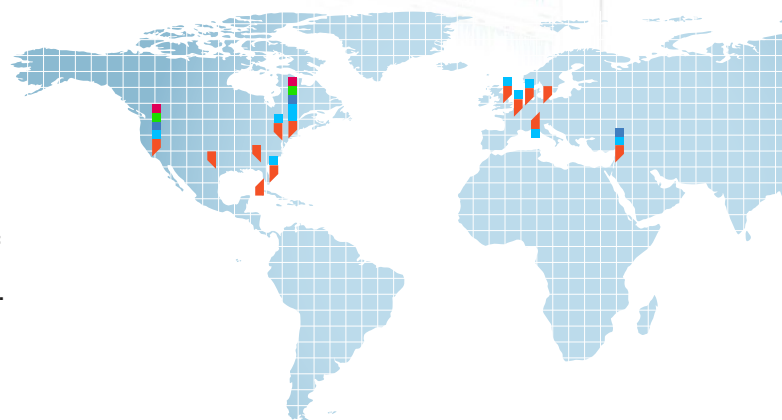

RayV Dashboard – All-in-one Management Tool

A Web-based back-office that allows you to manage your TV offering from one single powerful tool including packaging, user management, geo restrictions, syndication and real-time reporting and analytics.

RayV HDTV Network – The Power of a Global Network

The RayV Grid is the worlds first Telco grade HDTV Delivery Network over IP. Designed specifically to serve the world's most sophisticated content providers, we stream for telco's and networks tens of millions of hours of HDTV every month to millions of viewers in 150 countries. RayV operates the most robust, scalable and secure network for delivering high quality video on the web.
